Summary

Aspiring Front-End Web Developer with hands-on experience in building responsive and accessible websites using HTML, CSS, JavaScript (ES6), and React.js. Fast learner and highly adaptable—demonstrated by independently developing a real-time monitoring website for an IoT-based fish sorting system during our capstone project. Passionate about UI/UX design, clean code, and web standards, and eager to contribute to impactful projects in a dynamic front-end development team.

Highlights / Proficiencies

- Web Development: HTML5, CSS3, JavaScript (ES6), React.js
- CMS & Tools: WordPress customization, GitLab, GitHub, Canva, Google Workspace, Microsoft Office

Experience

Consultant Assistant | Freelance / Cotabato City / *Aug 2024 – May 2025*

- Designed 10+ PowerPoint and Canva presentations for training seminars with 100+ attendees.
- Supported content planning and design across projects, ensuring alignment with branding guidelines.
- Actively participated in project brainstorming, improving delivery efficiency and design consistency.

Education

Uplift Code Camp / *Front-End Web Development (Self-Paced) / April 2025 - Present*

- HTML, CSS, JavaScript, React.js, Git basics and best practices in responsive web design.

STI College of Cotabato / *Bachelor of Science in Computer Engineering / Expected 2026*

- Focused on software development, hardware systems, and real-world tech projects.

Achievements and Projects

- Personal Portfolio Website
  - Built a responsive web portfolio to showcase personal projects and skills using HTML, CSS, and GitHub Pages.
- Capstone Project: IoT-Based Automated Fish Sorting System
  - HTML, CSS, JavaScript, Firebase, WordPress
  - Developed a monitoring and control website for an automated fish sorting machine created for our Computer Engineering capstone project.
